BID DATE: March 31, 2015 10:00 AM

Bidders shall acknowledge receipt of this Addendum in the space provided on the Bid form and on the outside of the bid envelope. The intent of this addendum is to provide answers to questions submitted during the pre-bid time frame and does not change the plans or specifications of this project.

QUESTIONS & ANSWERS:

1) Is the pumping system to be designed for the flow amounts provided for each line on the Exhibit 1 flow schematic?
   a. See Specification 33 01 40 Diversion Pumping for additional bypass pumping requirements beyond the schematic flows

2) What is the maximum amount of discharge head that can be added to the Renner 27” force main?
   a. Zero – No additional head can be added to the force mains

3) Is the weir box on the 27” Renner force main going to be rehabilitated.
   a. Yes, the entire box is to be rehabilitated per Specifications 33 01 30.74, 33 05 13.75 & 33 30 13.04

4) Can we use any hydrants along the project area? Some were colored differently
   a. Coordinate with the respective utility owner prior to use of any hydrants. Use of hydrants is not assumed in the construction documents; therefore, coordination is the responsibility of the contractor.

5) According to Addendum 1, contractor is to give residents a 4 week notice prior to mobilization. Will these 4 weeks be added to the 180- day contract time? In other words, can the notices be sent out 4 weeks prior to the NTP date?
   a. Notices to residents and business owners affected by proposed operations can be sent out at any time following the notice of award. This activity may be completed prior to the notice to proceed; however, no extension of the 180 day schedule will be given for this.

6) Why are there no quantities in bid items 24 & 25?
   a. Items 24 and 25 (New Manholes) may not be required for this project. Bidder should include a unit price (not to be included in the total) in the event that new manholes are required.

End of Addendum #2
