Waste is unloaded at one of 3 NTMWD Transfer Stations or hauled straight to our landfill.

NTMWD 18-wheel tractor trailers transport the covered waste to our landfill.

Waste is unloaded, spread, and compacted in active landfill area with bulldozers and compactors.

To limit odor, several hundred collection wells capture the landfill gas, and NTMWD staff monitor for odor at 13 nearby locations.

NTMWD personnel cover the waste disposed each day with at least 6 inches of clean soil.

Landfill gas collected from wells is routed to an on-site facility where it is cleaned and sold as natural gas.

Taking Care of Waste - From Home to Disposal
